The thousands of workingmen who are employed by manufacturers of this country do not care an lota about this question of free silver. They say they do not, and it is apparent that what the industrial classes of America want is better times, a dawn of prosperity and some assurance that they will ere long receive better wages, or at least a stipend equal to that which they were getting before the financial depression which followed the Democratic victory of 1892. eratic victory of 1892.

MANTLE FOR TELLER.

Montana Senator Thinks He Should

CHICAGO, June 26.-The Record this morning prints an interview with Sonntor Lee Mantle, of Montana, who is stopping at the Auditorium, in which he says that Senator Teller should be nominated for the presidency by the Democrats at Chicago. When asked if he was in full sympathy with the sli-yer men who walked out of the St. Louis convention, the senator replied that he certainly was. Continuing, he

"I do, most emphatically. In my coinion he is at this time the only man in the public mind who can draw to himself the full strength of the bi-menalic sentiment of the country and unless the full strength of the move-ment can be concentrated upon one man defeat is certain."

"Do you think a silver Democrat "Do you think a silver Democrat could win?"

He then goes on to say that the issue upon which the coming political contest must be fought is not distinctively a Democratte principle or a Populist principle or a Republican principle and concludes as follows:

"The Populists and silver Republicans jointly will, I think, number at least three million votes—nearly or quite one-half of the votes.

NECESSARY TO BRING SUCCESS.

It is useless for our Democratic friends to say that these people are not honestly for bimetallism if they refuse to support a Democrat. The fact remains that many of them will not. The reasons are numerous and not difficult to explain.

The question, then, arises will the Democratic party in convention take note of these varying conditions and take for a standard bearer the only man who, it seems to me, can at this time successfully weld the bimetallic forces of the country into a homogeneous mass and lead them to victory.

"Senator Teller has formally renounced the Republican party, so that in supporting him no Democrat need fear that he is voting for a Republican. He stands pre-eminently as the

GREAT CHAMPION AND DEFENDER

of bimetallism in this country. Bimetallists everywhere fook upon him as their leader. He possesses in the fullest degree every necessary attribute of learning and experience and ability to discharge the great office of president of the United States.

"His record is absolutely clean and his personal character is above reproach. He is acceptable to the Populist marty, aithough he differs from them in many ways and without their endorsement the Democratic candidate cannot possibly be elected. No other candidate could attract the full Republican silver strength, which lies mainly in states which are absolutely essential to the success of the silver candidate.

with him as their nominee I firmly believe the Democrats can snatch a victory from what, up to the meeting of the National Republican convention at St. Louis was the most hopeless prospect which ever confronted a po-litical party."
